

Hereford Collar Neck Support?

The mouldable neck support with polystyrene beads is ideal for use during rehabilitation of a number of neck injuries and chronic conditions. The medi Hereford Collar allows for a completely adjustable support system which is both lightweight and washable allowing for use of a long period of time.

How does it work?

Featuring a mouldable form for unlimited adjustment and pressure beads which evenly spread across the neck to prevent sores, the lightweight Hereford Collar is ideal for use over long periods of time. Thumb loops allow for front and side opening which is easily fastened with a touch and close fastening system.

Clima-Comfort Technology

Reliable wicking transfer system allows the skin to breath and evaporates moisture away from the skin to keep the user cool, dry and comfortable. The high evaporating knit creates a microclimate for the skin whilst allowing it to breath at all times. The integrated Clima-Fresh function features antibacterial properties to prevent bacteria from forming in the knit to maintain optimum hygiene. All medi supports have been tested to meet Oeko-Tex Standard 100 and are developed and produced in Germany.
