

## **Thumb Support Brace.**

The thumb support has been specifically designed to provide warmth and support post injury whilst partially immobilising the injured thumb.

An integral metal splint provides protection and support whilst partially immobilising the thumb, maintaining it in a neutral position without compromising the movement of the rest of the hand.

The thumb wrap support is soft and comfortable to wear, easy to fit and fully adjustable. It provides a sufficient level of protection, support and compression required after any thumb injury.

Suitable for either right or left hand the thumb pain relief support is often recommended in the treatment of sprains, ligament damage and broken thumbs.

Manufactured to a high standard the thumb injury support is a versatile, easy-to-use product designed with practicality, versatility and comfort in mind.

This fully adjustable support is suitable for both men and women. One size fits all. The support is presented in a handy zip locked bag for easy portability and hygienic storage.

Constructed with a 100% breathable neoprene inner core and 100% nylon outer layer, our thumb support may be worn for a range of daily work, recreational and sporting activities. The elite airflow material is fully breathable meaning that the support is hygienic, comfortable and warm to wear.
